

Say No to Extinction!!!

We are near a global watershed – a time when White people will not be in the majority even in our own countries. Is this a worthy destiny for our children?

In 2000, White people became a 49.8% minority of the population of California, USA. Back in 1970, eight out of ten Californians had been White. According to the US Census Bureau, non-hispanic Whites will become a minority in the US by 2055.

White people are currently about 60% of the population of London, ethnic minorities- 40%, but by current demographic trends the Whites will be a minority by 2010. The total number of ethnic minorities in UK today is 3-4 million - over 6% of the total British population, yet they are growing by 3% a year... and by 2100 indigenous White people will be a minority in the UK...

(see the report in Guardian, Sept.3, 2000 at <http://www.guardianunlimited.co.uk/documentaries>)

By current trends the White founding population of Australia will become a minority by about 2050: leading demographer Dr. Charles Price predicted that Anglo-Celts would make up only 62.2% of the Australian population by 2025...

Germany will see a 25-30 % decline in population by 2050, dropping about 20-25 million, despite 100-200 thousand high fertility immigrants entering Deutschland every year... right now they already have 10-15 million foreigners!

[NWO ideologists claim that to maintain current population, over 3 million immigrants would have to enter Germany annually, and their controlled government never allows Germans to think *for whom* to maintain enhanced productivity/GNP if native population doesn't need it at the former level: German women have 1.4 births on average instead of the needed 2.1 – so let them plan and develop accordingly, not as UN self-interested maniacal “specialists” prescribe]

The Russian population of 145 million (today already racially diluted) is seen diminishing further to 120 million within 20 years and around 50-70 million. Within 50 years (by 2050) real Russians will comprise about 40 % of the population in the Russian Federation and 20 % in Moscow...

Today the French population in France is below 55 % and by the year 2025 there will remain only 35 % - that country will be inhabited mostly by mestizos, mulattos and blacks...

In Italy the native population is to decline by 15 million (20-25 %) in 2050, in Ukraine, Latvia and Estonia -- by 40-50 %...

Are you happy ???... Who is happy except the Jews and corrupt liberals ???...

The population of Europe by 2050 will be just 7% of the total world population as compared to 25% in 1900...

By then Whites will be outnumbered in many parts of Europe - thanks to treacherous EU policy: peoples of European descent will comprise around 10 % of the planet's populace.

UN predicts 98% of world population's growth in next decades only in developing/ underdeveloped nations...

Why does all this matter ?

It matters because **soon we are a rightless minority**, and ethnic minorities in predominantly non-White nations are almost invariably dispossessed and seriously persecuted.

Think of the treatment of Kurds in Turkey or Indonesian minorities or Tibetans in China, of the dispossession of white farming families in Zimbabwe or genocide and expulsions of Russians in the Caucasus and Central Asia, or of the White women in Africa gang-raped by blacks who believe this is a cure for AIDS, or Palestinian Arabs in Israel...

If you do not do something NOW to stop this happening, you are condemning your own children and grand-children to be dispossessed, and putting them on the path to eventual extinction.

The first step toward solving a problem is to acknowledge it. In this case, all White people around the world must be made aware that their entire Race is facing extinction within a few generations. If you do not want this to happen, you must alert everyone you know to the seriousness of the problem.

If the Whites of the world won't unite, they are finished very soon - to the joy of the rest ! We have no other choice...

White Revolution is the Only Solution!
